MIRROR IMAGE® is the engine that drives images through glass and mirror to deliver superb picture quality. All products are German made, custom-engineered, LCD technology. They are exclusively designed to overcome the unique challenges of operating in ventilation deprived environments and to allow easy and adjustable mounting. The unique magnet mounting system accompanying all products is distinctively designed to suit all particularized placements behind any glass surfaces.

When combined with MAGIC MIRROR®, MIRROR IMAGE® turns completely invisible when turned off. MIRROR IMAGE® technology is patent protected.

The FP LINE is a high-quality multifunction flush fitted monitor. The different models are equipped with FBAS, RGB and DVI signal inputs. In addition to excellent picture quality, the FP LINE monitors offer automatic signal recognition, very long lifetime, wide viewing angle, and automatic color and brightness adjustment.
